SEVIER

A Section of
Mutation Research
Founding Editor: F.H. Sobels

Aims and scope

MUTATION RESEARCH, Fundamental and Molecular Mechanisms of Mutagenesis publishes complete research papers in all areas of mutation research which focus on fundamental mechanisms underlying phenotypic and genotypic expression of genetic damage, molecular mechanisms of mutagenesis including the relationship between genetic damage and its manifestation as hereditary diseases and cancers. Additional 'special issues' which bring together research papers on specific themes of topical interest will also appear in this section.

Managing Editors

Dr. J. Ashby, ZENECA, Central Toxicology Laboratory, Alderley Park, Macclesfield, Cheshire SK10 4TJ, UK
Prof. J.M. Gentile, Biology Department, Hope College, Holland, MI 49423, USA
Prof. K. Sankaranarayanan, Department of Radiation Genetics and Chemical Mutagenesis, State University of Leiden, Sylvius Laboratories, Wassenaarseweg 72, P.O. Box 9503, 2300 RA Leiden, The Netherlands
Prof. B.W. Glickman, Director, Center for Environmental Health, Department of Biology, University of Victoria, P.O. Box 1700, Victoria, B.C., Canada V8W 2Y2

MUTATION RESEARCH

International journal on mutagenesis, chromosome breakage and related subjects

Vols. 326–348 (1995)

ANNUAL CUMULATIVE INDEX

US mailing notice — Mutation Research, Fundamental and Molecular Mechanisms of Mutagenesis (ISSN 0027-5107) is published monthly, except semimonthly in January, April, July and October, by Elsevier Science B.V., (Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam, The Netherlands). Annual subscription price in the U.S.A. US$1784.00 (valid in North, Central and South America only), including air speed delivery. Second class postage is paid at Jamaica, NY 11431.

USA POSTMASTERS: Send address changes to MUTATION RESEARCH, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003.

Airfreight and mailing in the U.S.A. by Publications Expediting.

Advertising Advertising orders and enquiries can be sent to the Advertising Manager, Elsevier Science B.V., Advertising Department, P.O. Box 211, 1000 AE Amsterdam (The Netherlands), Tel.: 20-515.3220; FAX: 20-683.3041, attn. Advertising Dept.; Great Britain: T.G. Scott and Son Ltd., Portland House, 21 Narborough Road, Cosby, Leicestershire LE9 5TA, Tel.: 0533-753.333; FAX: 0533-750.522, attn. Tim Blake; U.S.A. and Canada: Weston Media Associates, Daniel Lipner, P.O. Box 1110, Greens Farms, CT 06436-1110, Tel.: 203-261.2500; FAX: 203-261.0101.

This journal is printed on acid-free paper.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of the rapid advances in the medical sciences, the Publisher recommends that independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970 (U.S.A.). If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. The fee indicated on the first page of an article in this issue will apply retroactively to all articles published in the journal, regardless of the year of publication This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the Publisher for such copying.

Mutation Research INDEX (1995) 1–31

Master Author Index to Volumes 326–348

Aardema, M.J. and Tsutsui, T.
Sodium fluoride-induced chromosome aberrations in different cell cycle stages (331) 171
Aardema, M.J., see Gibson, D.P. (343) 7
Aaron, C.S., Yu, R.L., Bacon, J.A., Kirkland, D., McEnaney, S. and Marshall, R.
Comparative mutagenicity testing of ceftiofur sodium II. Cytogenetic damage induced in vitro by ceftiofur is reversible and is due to cell cycle delay (345) 37
Aaron, C.S., Yu, R.L., Harbach, P.R., Mazurek, J.M., Swenson, D.H., Kirkland, D., Marshall, R. and McEnaney, S.
Comparative mutagenicity testing of ceftiofur sodium: I. Positive results in in vitro cytogenetics (345) 27
Aaron, C.S., Yu, R.L., Jaglan, P.S., Roof, R.D., Hamilton, C., Sorg, R., Gudi, R. and Thilagar, A.
Comparative mutagenicity testing of ceftiofur sodium: III. Ceftiofur sodium is not an in vivo clastogen (345) 49
Abatecola, M., see Giancotti, P. (348) 187
Abdelali, H., Cassand, P., Soussotte, V., Koch-Bocabeille, B. and Narbonne, J.F.
Antimutagenicity of components of dairy products (331) 133
Abe, M., see Shibata, T. (342) 171
Abend, M., Blakely, W.F. and Van Beuningen, D.
Simplified and optimized kinetochore detection: cytogenetic marker for late-G_2 cells (334) 39
Abraham, S.K.
Inhibitory effects of coffee on transplacental genotoxicity in mice (347) 45
Abraham, S.K., see Singh, S.P. (345) 147
Abrahams, P.J., Schouten, R., Van Laar, T., Houweling, A., Terleth, C. and Van der Eb, A.J.
Different regulation of p53 stability in UV-irradiated normal and DNA repair deficient human cells (336) 169
Achiwa, I., see Terao, Y. (346) 99
Adami, H.-O., Persson, I., Ekbom, A., Wolk, A., Pontén, J. and Trichopoulos, D.
The aetiology and pathogenesis of human breast cancer (333) 29
Adams, D.E. and West, S.C.
Relaxing and unwinding on Holliday: DNA helicase-mediated branch migration (337) 149
Adler, I.-D., Cochrane, J., Osterman-Golkar, S., Skopek, T.R., Sorsa, M. and Vogel, E.
1,3-Butadiene working group report (330) 101
Adler, I.-D., Filser, J.G., Gassner, P., Kessler, W., Schöneich, J. and Schriever-Schwemmer, G.
Heritable translocations induced by inhalation exposure of male mice to 1,3-butadiene (347) 121
Adler, I.-D., see Waters, M.D. (341) 109
Agarwal, K., see De, A.K. (335) 253
Aguirrezabalaga, I., Sierra, L.M. and Comendador, M.A.
The hypermutability conferred by the *mus308* mutation of Drosophila is not specific for cross-linking agents (336) 243
Ahmad, M., see Rehana, Z. (343) 137
Ai-guo, M., see Collins, A.R. (336) 69
Akasaka, S., see Nakano, T. (336) 153
Akiyama, M., Kyoizumi, S., Hirai, Y., Kusunoki, Y., Iwamoto, K.S. and Nakamura, N.
Mutation frequency in human blood cells increases with age (338) 141
Akiyama, M., see Hirai, Y. (329) 183
Akiyama, T., see Sarker, A.H. (337) 85
Akyol, D., see Şardaş, S. (335) 213
Akyol, D., see Şardaş, S. (341) 249
Al-Sabti, K. and Metcalfe, C.D.
Fish micronuclei for assessing genotoxicity in water (343) 121
Al-Sabti, K.
An in vitro binucleated blocked hepatic cell technnique for genotoxicity testing in fish (335) 109
Alaoui-Jamali, M., see Bramson, J. (336) 269
Alaoui-Jamali, M.A., see Yen, L. (337) 179
Albertini, R.J., see Branda, R.F. (346) 121
Albertini, R.J., see Lippert, M.J. (326) 39
Albertini, R.J., see Lippert, M.J. (326) 51
Ali-Sadat, S., see Butterworth, F.M. (342) 61
Allen, J., see Lowe, X. (338) 59
Allen, J.W., Ehling, U.H., Moore, M.M. and Lewis, S.E.
Germ line specific factors in chemical mutagenesis (330) 219
Almstadt, E., see Dahlhaus, M. (329) 29
Alonso, C.D., see Sato, M.I.Z. (335) 317
Amlöf, T., see McEwan, I.J. (333) 15
Ananth, C.V., see Olshan, A.F. (344) 89
Anastasiou, A., see Mourelatos, D. (346) 129
Anderson, D., Basaran, N., Blowers, S.D. and Edwards, A.J.
The effect of antioxidants on bleomycin treatment in in vitro and in vivo genotoxicity assays (329) 37
Anderson, D., Bishop, J.B., Garner, R.C., Ostrosky-Wegman, P. and Selby, P.B.

Cyclophosphamide: Review of its mutagenicity for an assessment of potential germ cell risks (330) 115
Anderson, J., see Krishna, G. (335) 331
Anderson, R.D., see Sedwick, W.D. (326) 17
André, V., Boissart, C., Sichel, F., Gauduchon, P., Le Talaër, J.Y., Lancelot, J.C., Robba, M., Mercier, C., Chemtob, S., Raoult, E. and Tallec, A.
Mutagenicity of nitro- and amino-substituted carbazoles in *Salmonella typhimurium*. II. Ortho-aminonitro derivatives of 9H-carbazole (345) 11
Andrivon, W., Callais, F., Nafziger, J., Monneret, C. and Guillosson, J.J.
A new anthracycline with potent antileukemic activity exhibits reduced mutagenicity (344) 135
Anson, R.M., see Bohr, V.A. (338) 25
Antoccia, A., see Carere, A. (332) 17
Antonetti, M., see Ciranni, R. (343) 53
Antonopoulos, A., Yang, B., Stamm, A., Heller, W.-D. and Obe, G.
Cytological effects of 50 Hz electromagnetic fields on human lymphocytes in vitro (346) 151
Anwar, W.A. and Shamy, M.Y.
Chromosomal aberrations and micronuclei in reinforced plastics workers exposed to styrene (327) 41
Anzidei, P., see Padovani, L. (332) 33
Anzidei, P., see Tedeschi, B. (332) 39
Apostolides, Z. and Weisburger, J.H.
Screening of tea clones for inhibition of PhIP mutagenicity (326) 219
Appel, K.E., see Dahlhaus, M. (329) 29
Appeldoorn, E., see Van Vuuren, A.J. (337) 25
Appolloni, M., see Padovani, L. (332) 33
Appolloni, M., see Tedeschi, B. (332) 39
Arakawa, N., see Oguri, A. (346) 57
Araki, K., see Mano, H. (341) 225
Arbour-Reily, P., see Fossett, N.G. (331) 213
Arce, G., see Elia, M.C. (341) 141
Arceo, C., see Olvera, O. (346) 19
Ardito, G., see Bigatti, M.P. (347) 157
Arima, T., Tada, S., Makita, Y., Kurono, M. and Umeda, M.
Effect of *Clostridium perfringens*-derived wound healing substance as compared with epidermal growth factor on the growth and morphological transformation of BALB/3T3 A31-1-1 cells (341) 217
Arimoto, S., Kan-yama, K., Rai, H. and Hayatsu, H.
Inhibitory effect of hemin, chlorophyllin and related pyrrole pigments on the mutagenicity of benzo[*a*]pyrene and its metabolites (345) 127
Arimoto, S., see Yamashita, Y. (348) 163
Arreola, G.A., see Ma, T.-H. (334) 185
Arruga, M.V., see Catalan, J. (331) 205
Asakura, S., see Sawada, S. (344) 109
Asanami, S., Shimono, K., Sawamoto, O., Kurisu, K. and Uejima, M.
The suitability of rat peripheral blood in subchronic studies for the micronucleus assay (347) 73
Ashby, J. and Clapp, M.J.L.
The rodent dominant lethal assay: a proposed format for data presentation that alerts to pseudo-dominant lethal effects (330) 209
Ashby, J. and Paton, D.
Chemicals for evaluating the sensitivity and specificity of reduced/transgenic rodent cancer bioassay protocols (331) 27
Ashby, J. and Tinwell, H.
No. 55. Activity of etoposide in the mouse bone marrow micronucleus test: independence of route of exposure (328) 243
Ashby, J. and Tinwell, H.
A sequential approach to testing with the rodent bone marrow micronucleus assay – obviation of the need for statistical analyses of data (327) 49
Ashby, J.
No. 54. Rodent germ cell mutagens and their activity in the rodent bone marrow micronucleus assay (328) 239
Ashby, J.
Genetic toxicity in relation to receptor-mediated carcinogenesis (333) 209
Ashby, J.
No. 57: Druckrey's definition of 'genotoxic' (329) 225
Ashby, J.
Rodent mutation assay data presentation and statistical assessment (331) 233
Ashby, J., see Morrison, V. (329) 107
Ashby, J., see Tinwell, H. (335) 185
Au, W.W., Bechtold, W.E., Whorton Jr., E.B. and Legator, M.S.
Chromosome aberrations and response to γ-ray challenge in lymphocytes of workers exposed to 1,3-butadiene (334) 125
Au, W.W., see Chiewchanwit, T. (334) 341
Au, W.W., see Chiewchanwit, T. (335) 121

Trichothiodystrophy, (346) 107
Triethylenemelamine, (327) 87, (328) 193
Trigeminal neuralgia, (334) 259
Trimethoxybenzoic compound, (327) 237
4,5′,8-Trimethylpsoralen, (346) 173
Triosephosphate isomerase null mutant, (328) 163
2,4,6-Tris(1-aziridinyl)-1,3,5-triazine, (327) 87
Trypan blue exclusion, (342) 191
Tuberculosis chemotherapy, (334) 175
Tubular adenoma, (333) 143
Tubulin immunostaining, (343) 1
Tumor initiation, (341) 217
Tumor promoter, (326) 245, (333) 173
Tumor promotion, (328) 55, (341) 217
Tumor suppressor gene, (333) 181
Tumour promotion, (334) 49, (346) 151
Tyramine, (345) 155, (347) 17

UDS, (339) 15
Ultraviolet, (334) 375
Ultraviolet radiation, (337) 161
UmuD cleavage, (336) 39
Umu test, (334) 145
University of wisconsin solution, (335) 309
Unscheduled DNA synthesis, (344) 109, (348) 169
Uranium toxicity, (347) 31
Uranyl compound, (347) 31
Urethane (ethyl carbamate), (341) 255
Urinary mutagen, (341) 207
Urinary thioether, (335) 163
Urine mutagenicity, (340) 51
Urothelial cells, (335) 163
U.S. cigarette brands, (342) 179
U5 snRNA, (326) 71
UV, (336) 143
UV-induced mutations, (326) 131
UV irradiation, (346) 9, (348) 67
UV light, (328) 175, (335) 129
UV-light, (344) 31
UV mutagenesis, (329) 1
UV photoproducts, (347) 117
UV radiation, (328) 63, (336) 115
Uvr system, (346) 9
UV-sensitive mutant, (336) 251
UV sensitivity, (347) 25

Vanadate, (326) 93
Vanadium, (343) 53
Variance component, (327) 201
Vasopressin, (338) 173
V79 cell, (348) 1
V79 cell line, (343) 85
V79 cells, (328) 63, (329) 29, (335) 27
V(D)J recombination mutant, (336) 279
Vegetable, (341) 303
Vibrio cholerae, (327) 5
Vicia, (334) 185
Vinblastine, (331) 181
Vinyl chloride, (339) 1
Vitamin A, (332) 109
Vitamin K, (347) 135
Vitamins, (346) 195
V79 mutant cell line, (336) 307

Wastewater, (342) 1
Water, (343) 121
White-ivory, (335) 151
WI-38 cells, (337) 19
Wilson's disease, (326) 235
WIN 59075, (342) 171
Wing spot test, (343) 229, (346) 145
Wood drying condensate, (342) 191
Workshop meeting, (337) 57

XAD-2, (342) 1
X chromosome, (338) 107
Xeroderma pigmentosum, (336) 91, (337) 111
Xeroderma pigmentosum group G, (347) 55
Xeroderma pigmentosum variant, (337) 161
X-irradiation, (326) 1, (336) 1, (346) 107
XP variant, (337) 111
X-ray, (335) 229, (335) 245, (341) 17
X-ray irradiation, (347) 67
X-rays, (326) 155, (328) 63, (331) 39, (331) 79, (331) 89, (334) 317
X-ray sensitive mutant, (336) 215
X-ray sensitivity, (336) 279
XRCC1, (348) 111

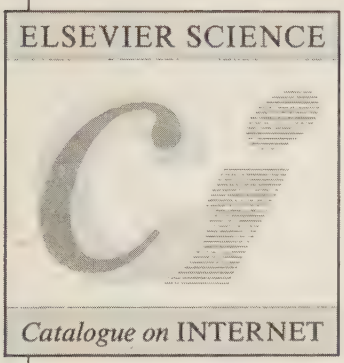
Y chromosome, (338) 107
Yeast, (337) 73, (346) 207
Yeast, alkylation-sensitive, (336) 133
Yeast artificial chromosome, (326) 39
Yeast cell, (326) 211
Yogurt, (334) 213

lacZ, (338) 183
pZ189, (336) 153
Zea mays S2, (329) 11
Zinc, (348) 37, (348) 201
Zinc chloride, (346) 15
Zona-free hamster oocytes, (326) 185
lacZ transgene, (338) 189
Zygote, (339) 155

AVAILABLE AT YOUR FINGERTIPS:

THE ELSEVIER SCIENCE COMPLETE CATALOGUE ON INTERNET

Features include:



- All the journals, with complete information about journal editors and editorial boards
- Listings of special issues and volumes
- Listings of recently published papers for many journals
- Complete descriptions and contents lists of book titles
- Clippings of independent reviews of published books
- Book series, dictionaries, reference works
- Electronic and CD-ROM products
- Full text search facilities
- Ordering facilities
- Print options
- Hypertext links
- Alerting facility for new & forthcoming publications
- Updated monthly
